PROFILE

Independent security researcher building a paid audit practice for AI infrastructure, MCP servers, and agent tooling. Research focuses on authentication and authorization, tool trust boundaries, sandbox isolation, and sensitive-data handling. Brings a record of externally validated findings and coordinated disclosure, alongside experience building customer-facing software and managing daily business operations.

SECURITY RESEARCH HIGHLIGHTS

- **57 externally validated vulnerability findings**, including 41 High/Critical outcomes and 16 directly attributable public records across vendor advisories, security bulletins, releases, and maintainer-confirmed issues.
- **AWS:** Publicly credited by AWS for PostgreSQL MCP command-execution research; AWS Security separately confirmed six implemented awslabs/mcp fixes. AWS-2026-104.
- **Microsoft:** Ranked #337 on the MSRC 2026 Q2 Points Leaderboard.
- **Public portfolio:** Credited work includes the MCP Python and Ruby SDKs, SigNoz, Obot, Zigbee2MQTT MCP, MCP SSH Tool, Repomix, Heimdall MCP, and DeepCode.

RESEARCH & AUDIT PRACTICE

Independent Security Researcher | 2026 - Present

- Review source code from entry points through trust boundaries; connect missing controls to concrete user, data, and system impact.
- Develop safe local reproductions, negative controls, and patch checks; document root cause, deployment assumptions, severity rationale, and practical remediation.
- Coordinate reports and follow-up with vendor security teams and open-source maintainers, including AWS Security, MSRC, and IBM project maintainers.
- Developing scoped paid audits for AI/MCP infrastructure, with evidence-backed findings, remediation guidance, and fix verification as core deliverables.

BUILDING & OPERATIONS EXPERIENCE

Founder & Technical Lead, DreamSiteBuilders / TurfRank | 2025 - Present

- Shipped 15+ production websites and customer-facing systems for local businesses. Built TurfRank as an audit API/product for business review, search, trust, lead, and conversion checks.
- Built AI-assisted workflows for research, implementation, QA, reporting, and customer handoff, with human review of external actions.

Department Manager & Person-in-Charge, Albertsons / Acme Markets | Nov 2022 - Present

- Managed storewide operational coverage and urgent issues; trained 30+ employees and reduced shrink by 12% using operating reports, purchasing data, and process improvements.

TECHNICAL FOCUS & EDUCATION

Security: Authentication/authorization, SSRF, injection, sandbox escape, unsafe execution, file/path traversal, sensitive-data exposure, and deployment configuration.
Tools: Python, Bash, SQL, JavaScript/TypeScript, Linux, Docker, Kubernetes, GitHub disclosure workflows, MCP, and browser automation.
Education: Rowan University, B.A. Economics, 2023. Founder, Blockchain Studies Club.
